

# Work Safely in the Vicinity of National Grid's Gas Pipelines

Remember, you need to contact two organisations for gas pipeline enquiries

## Gas Pipelines – Who to Contact

### GAS TRANSMISSION

National Grid owns and operates the national gas transmission network covering England, Wales and Scotland.

For more details please see:

<http://www.nationalgrid.com/uk/LandandDevelopment/DCC/gaselectricnw/gaspipes>

Linesearch is a free online enquiry system designed to give instant results to the apparatus owned and/or operated by many UK utilities – see [www.linesearch.org](http://www.linesearch.org)

NATIONAL GRID's gas transmission pipelines and above ground sites may be directly affected by work you are considering or intending to undertake. In order to determine if this is the case and to ensure that you work safely close to such pipelines, please contact in writing our Asset Protection Team below. Remember to enclose a clearly identifiable plan and site grid reference with your letter.

National Grid UK Transmission  
Land and Development  
Transmission  
Asset Protection Team  
P.O. Box 3484  
Warwick  
CV34 6TG

You may wish to check the progress of your enquiry by calling the Asset Protection Team on the FREEPHONE number:

**0800 731 2961**

### GAS DISTRIBUTION

National Grid owns and operates the gas distribution network in the area shown in blue on the map below. Separate gas distribution network companies own the gas distribution networks within the areas shown in white below.

NATIONAL GRID's gas distribution pipelines and above ground sites may be directly affected by work you are considering or intending to undertake. In order to determine if this is the case and to ensure that you work safely close to such pipelines, please contact in writing our Plant Protection Team below. Remember to enclose a clearly identifiable plan and site grid reference with your letter.

National Grid Gas Distribution  
Plant Protection  
National Grid  
Block 1 Floor 2  
Brick Kiln Street  
Hinckley  
LE10 0NA

**0800 688588**

For information on gas distribution pipelines in other areas of England, Wales or Scotland (see map above) you should contact the relevant gas distribution network company. To find their contact details go to the Energy Networks Association web site: [www.energynetworks.org](http://www.energynetworks.org)

To report a gas escape or emergency or if a pipeline is damaged, even slightly (even if no gas leak has occurred) call the National Gas Emergency Service 24 hours a day on 0800 111 999\*

\*All calls are recorded and may be monitored.

# Work Safely in the Vicinity of National Grid's Electricity Lines and Underground Cables

Remember, you need to contact two organisations for electricity overhead line  
and underground cable enquiries

## Electricity Lines and Underground Cables – Who to Contact

### ELECTRICITY TRANSMISSION

National Grid owns and operates the high voltage (275,000 volt and 400,000 volt) electricity transmission network covering England and Wales.

For more details please see:

<http://www.nationalgrid.com/uk/LandandDevelopment/DCC/electricitytransmission/overheadlines>

Linesearch is a free online enquiry system designed to give instant results to the apparatus owned and/or operated by many UK utilities – see [www.linesearch.org](http://www.linesearch.org)

NATIONAL GRID's overhead lines, underground cables and substations may be directly affected by work you are considering or intending to undertake. In order to determine if this is the case and to ensure that you work safely close to our overhead lines and underground cables please contact in writing our Asset Protection Team below. Remember to enclose a clearly identifiable plan and site grid reference with your letter.

You may wish to check the progress of your enquiry by calling the Asset Protection Team on the FREEPHONE number:

**0800 731 2961**

### ELECTRICITY DISTRIBUTION

For information on electricity distribution network overhead lines and underground cables and substations in England, Wales or Scotland you should contact the relevant electricity distribution network company.

To find the contact details for distribution network operators go to the Energy Networks Association web site: [www.energynetworks.org](http://www.energynetworks.org)

For reporting electrical emergencies, including damage to a National Grid pylon, call the FREEPHONE number 0800 40 40 90.

If possible, make a note of the pylon's number, as it helps our teams to locate it.
